Them&Us Technical Spec

Sound

1x DI box for the Bass guitar

1x DI box for the piano/Keys

1x CDJ for playback (CD) (unless CD can be played from Front of house)

2x Vocal microphones - one for lead vocal, one for beatbox.

2x 1/4 inch jack leads (long enough to go into mixer directly, or plug in via a junction) for Keyboard

1X Sufficient Electircal Sockets for Laptop, Fog Machine and Lights

Lights

We will send the sound man a private soundcloud link to our set, with details of lighting requirements with comments on specific times in the set. Basically when the songs 'drop', thats when the lights would move/change. The more atmospheric the lighting can be and work with the music the better. We can also send him the video from our last performance at Water Rats so he can get more idea of how our show works visually and sound wise.
