Artist Bio wesbound

Coming from a semi-professional turned professional musical background with periods of formal education both in teenage and twen days, wesbound musically picks up where he left off some 25 years ago, seeking closure with music that's been inspiring him from the early 80ies on until today.

Styles his music draws from are across the board of contemporary American music traditions, such as the Blues, R&B, Funk, all with some tinges of a Jazzy feel to them as it became popular with Acid Jazz from the UK.
