

**NAPALMA** is a Berlin based music project that entails the exploration of our boundaries through adventure, they mingle afro-brazilian sounds and percussions, electronic beats, brasses and eclectic vocals as a groovy explosion conceived with a original formula, that started in Brazil in 2004.

**NAPALMA** has got a whole new shape during 2019 having the new vocalist **Abass Ndiaye** from Senegal composing new tunes and performing his first tours and producing the New EP, to be released in 2020.

Brazilian percussionist and electronic programmer **Cid Travaglia**'s drumming style is the dynamite on wich **Abass Ndiaye**, vocalist, guitarist and percussionist bounces with his magical playfulness and highlights West African style and melodies, accompanied by a brass player to build harmonies and solos that make the audience levitate.

The colorful melodies acquire original forms, based on a fidelity to a variety of percussive beats. This creates a trance that surprisingly is not based on a limitless repetition of resources. **NAPALMA** managed to call the attention of both, media and public through their powerful live performances.

For a full and comprehensive experience, you need to attend their shows. In a few seconds, stay assured, you'll find yourself dancing along and never stop!
