

LaDinamo

music on cycles

LaDinamo is Funk on the Move - Music on Cycles. A unique band on wheels, breaking the mould.
LaDinamo performs a high-voltage moving concert and a frenetic street party to the rhythm of Funk.
An interactive show where the public can participate making every concert unique and different.

**Have you ever seen a concert performed on a bicycle?
A concert that moves through different parts of the city?**

The asphalt becomes an improvised stage. A vehicle made from rusty bikes transports seven musicians showering Funk music on everyone who crosses their path. The musical intensity hypnotizes the pedestrians, the musicians attitude is frenetic and the constant improvisation makes for unrepeatable moments.

LaDinamo has arrived in your city. Sunshine or rain they have made your streets theirs. Where once there was calm a concert arrives to transform the silence into a party and shortly after the moment becomes an unforgettable scene. Never before have you seen the likes of a Funk band on wheels giving their all in front of your house.

This is **LaDinamo**, infinite music and overflowing passion at every street corner. What a great gift for a city looking for a surprise way to enjoy themselves!

Music on Cycles

LaDinamo is a Funk band on wheels: a Catalan outdoor arts and music company. They perform '**Music on Cycles**', a moving street show, a Funk concert for all types of public.

The project began in 2014 when its creator Ander Condon decided to develop an original project which covered various concepts: black music, street shows and the bicycle as a means of transport.

By autumn 2016 the show '**Music on Cycles**' had consolidated itself in terms of format, image and current repertoire with a presentation at MAC (Mercè Arts de Carrer) and the Fira Mediterrània de Manresa. From then onwards the group participated with great success at the main music and street art festivals in Catalonia and Spain and also gained important international experience with performances in France, UK, Belgium, Germany, Portugal, Croatia and China.

Artistic File

Line up:

Zésar Martínez: Vocals & Keyboard

Ander Condon: Bass

Pol Padrós: Tenor Saxophone

Albert Clapés: Trumpet

Gerard Brugués: Guitar

Jesús Guirao: Drums

Ignasi Piccorelli: Percussions

Creation: Ander Condon

Direction of Music: Ander Condon & Zinkman

Production: LaDinamo

“Good for your Ears” - **Funkadelic** + LaDinamo Horns
“Sex Machine” - **James Brown**
“You Gotta Know” - **Supergroove**

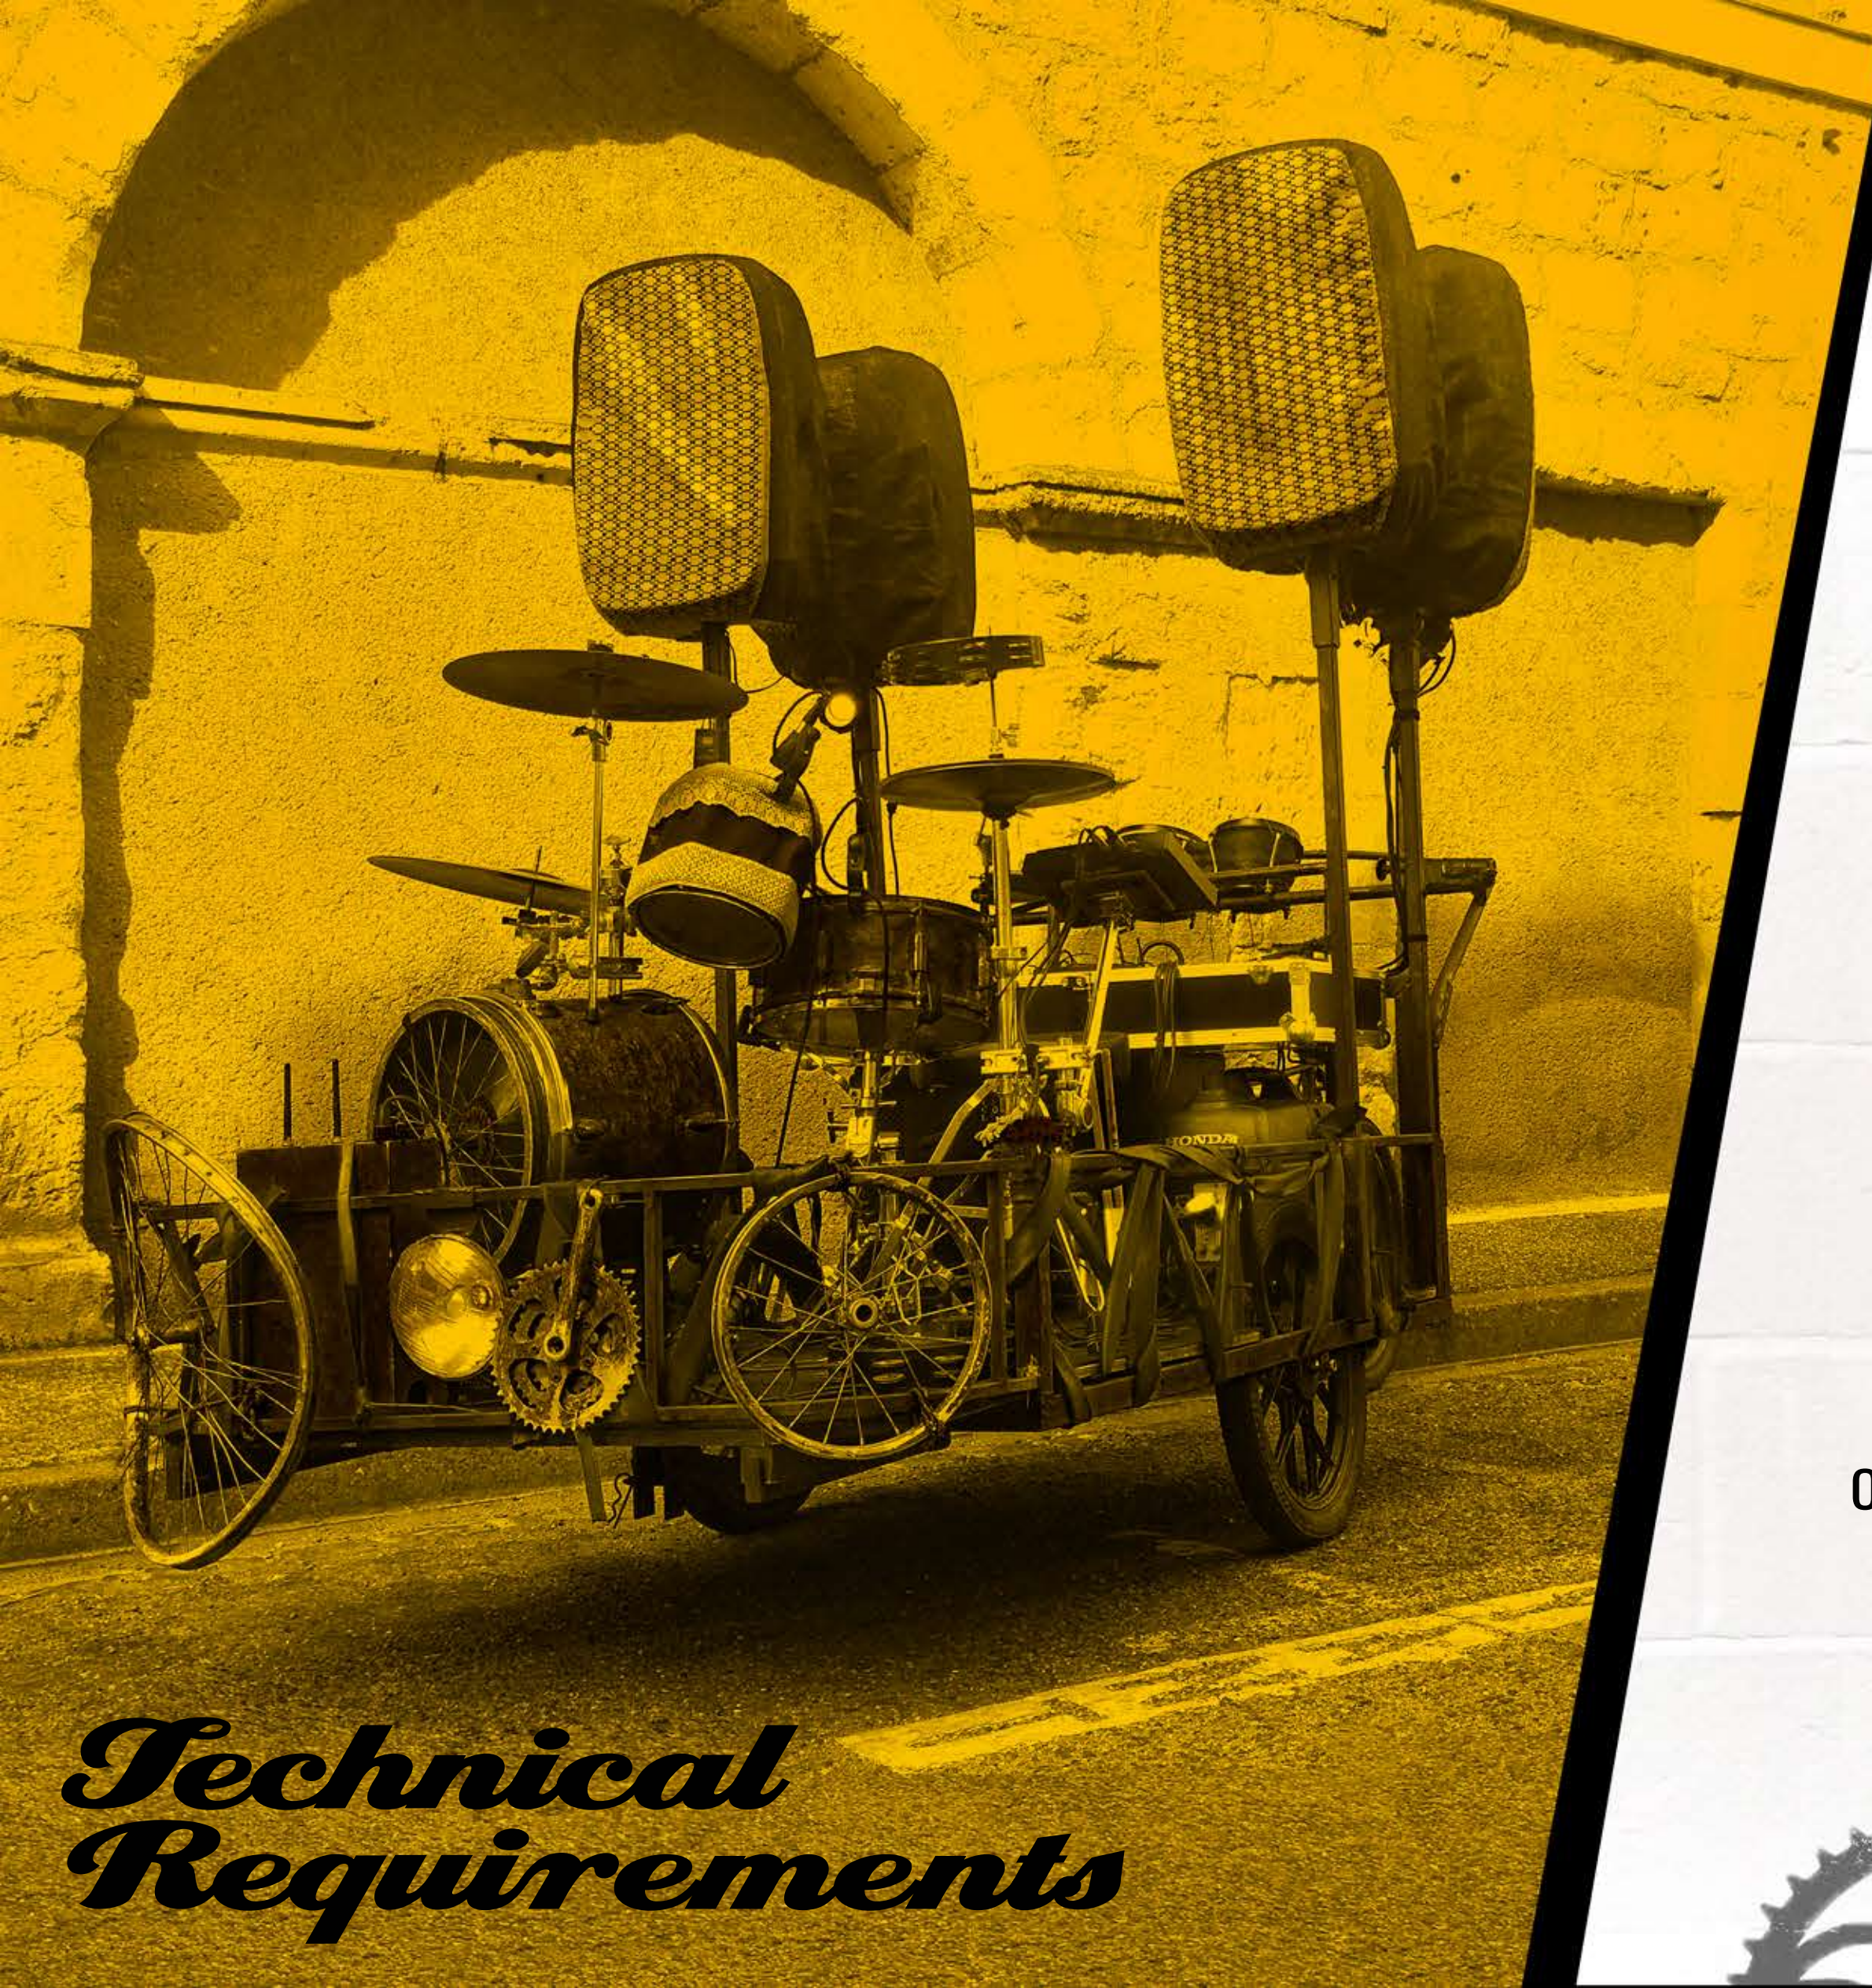

Street Funk

LaDinamo consists of seven musicians with an extensive musical and artistic background who perform an exclusive repertoire where Funk and Groove music fuse with their exciting, intense and wild stage presence. Some songs are original compositions, but above all the band performs personal arrangements and free structured versions of Funk classics or covers from other current and unknown bands. It is interesting to note that they also perform mashups, combining music and lyrics from different songs to make a new piece. The constant improvisation, the high level of musicality and the interaction with the street audience and surroundings make each **LaDinamo** show unique and unrepeatable.

During the winter of 2018 they recorded their first album '**Funk on the Road**', which the band released independently in May 2018.

Technical Requirements

8 people take part in a performance by LaDinamo: 7 musicians + 1 production

COMPLETELY SELF-SUFFICIENT SHOW IN TECHNICAL REQUIREMENTS

The show is amplified, and all backline, sound system (2000w) and power supply during the show are provided by the band.

TECHNICAL FEATURES OF THE VEHICLES:

BIKE 1: 6 m long x 1.30 m wide x 2.50 m height
(vehicle formed by the union of a tricycle and several bicycles).

BIKE 2: 2.50 m long x 1.70 wide x 2.50 m height
(vehicle carrying the drums and the sound system).

PERFORMANCE FORMAT:

It is an itinerant street show. The musicians appear among the public with their bicycles. The show is amplified, they have their own sound system and instruments with wireless systems. The band goes on a tour of the city on their bikes, stopping along the way when convenient.

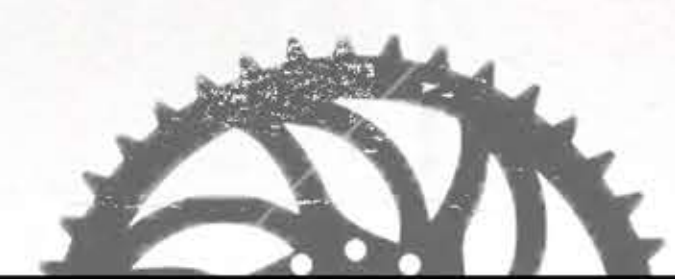

A route of between 400 and 800 m (flexible) is required. The route covered must be free of traffic or other obstacles which could obstruct the performance.

Special attention must be paid to width of the streets, turning spaces, very steep slopes and urban obstacles (balconies, pavements, terraces)

On the day of the show a technical visit to the route and the performance space is required before performance. Although conceived as a street parade, the show is adaptable to different formats, and can be performed statically or on stage (LaDinamo Statik Funk Xplosion).

DURATION OF THE SHOW:

75 minutes (flexible / possibility to perform in 2 sets)

Attention !

The show's schedule is pre-planned from its beginning to the end:

Firstly, a static performance in a wide area

Then an itinerant tour with 1, 2 or 3 stops to be arranged

Finally a static final performance in a wide area

*In defining the show route it is important to identify these initial, final zones and itinerant stop locations.

A good planning of the route by the organizer is needed to avoid the **overlap** and the **proximity** with other shows during the tour.

It's an amplified itinerant show and we want to **avoid acoustic interferences** that could hinder the correct development of our performance, or interfere with the acts of other companies performing simultaneously close to our show route.

SETTING UP TIME:

Setting up: 4h // **Packing up:** 1h 30 min. Space for the assembly and dismantling of the bikes (indoor or outdoor), appropriate to the dimensions of the vehicles, is needed. As part of the setting up a sound check of 45 minutes will be made. Parking should be made available for 1 van + 1 trailer near the performance site.

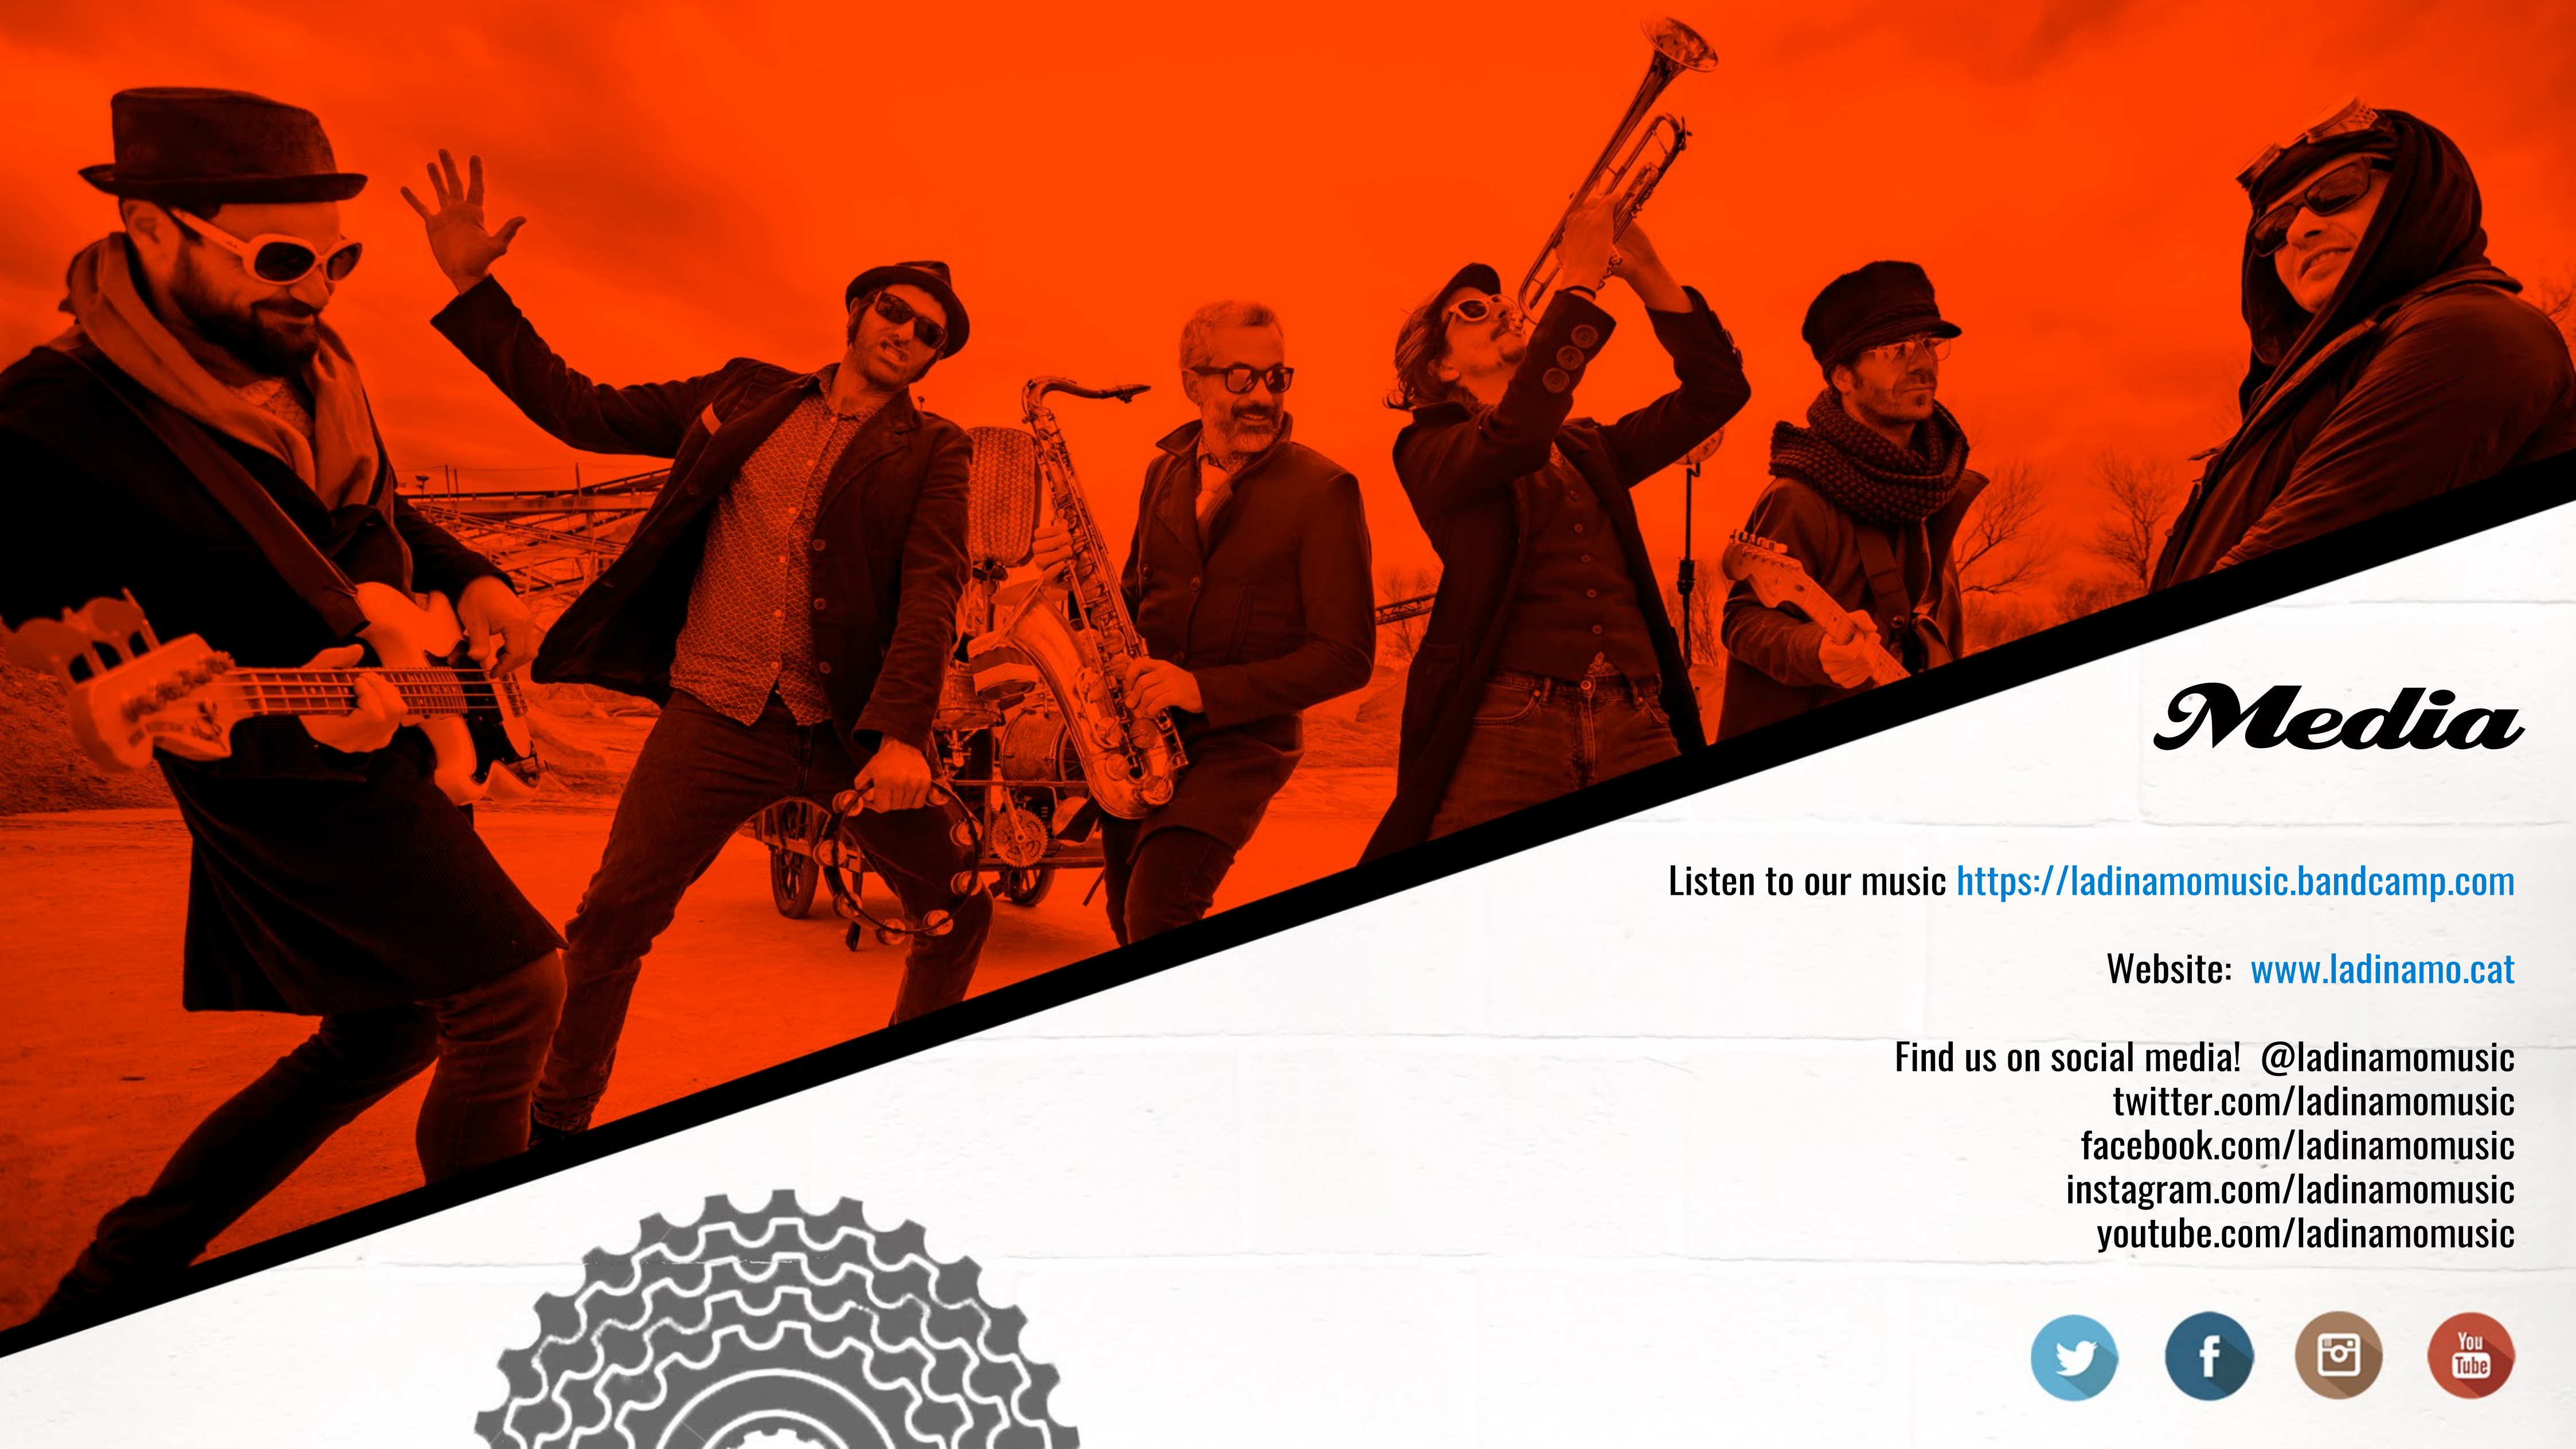

VEHICLES SIZES: **Van:** 5,42 m long x 2,50 m wide x 2,50 m height **Trailer:** 3,20 m long x 1,80 m wide x 1,90 m height

It's important to have full access to the van and the trailer during the time of assembly.

A dressing room or a similar clean and properly prepared area with sufficient space for 8 people is required for changing and for storing material and personal objects. This must be available from the band's arrival until load-out is complete. The dressing room should be as close as possible to the performance site, and should have a mirror, sufficient chilled bottled water for the rehearsals and the performance, and courtesy catering.

* In case of several performances on consecutive days a covered and secured warehouse will be required to storage assembled vehicles and equipment from one day to another.

IMPORTANT! There should be a stage manager or person responsible for the event's organisation, contactable on site to attend to the band's needs from arrival until load-out is complete.
