ellister van der molen

Technical Rider Ellister van der Molen Quartet

Technical:

We trust the inhouse sound engineers, we don't travel with our own sound engineer. A professional, nice, experimented, English spoken sound-engineer is requested to assist the band for soundcheck and performance. Please feel free to call us, if you have any questions.

Stage dimensions should be at least 5x4 square meters.

Trumpet: brings own DPA 4099 clip/on mic; please supply a wireless mic with boom stand for the announcements

piano: please supply a tuned grand piano with an adjustable stool with 2 x Neumann KM84 or comparable

double bass: brings AMT S25B and own amp.

drums: please supply 2 overhead

Power outlet: AC 220V earthed (European standard)

Please supply a **monitor** with independant mix for each musician

Stage lights can contribute to a nice experience for the listener. The main focus should be a nice, warm ambience and a good visibility of all musicians. No disco show.

Hospitality:

On stage:

Please provide 8 small bottles of regular water: 2 for each musician.

Backstage:

Please provide 2 private, lockable, medium size rooms with mirror, chairs, sofas, towels and lights. In each room, snack/catering will be provided: a variety of soft drinks, plenty of mineral water, a bottle of red wine, coffee and tea, a good amount of chilled beers, assorted fruits and some snacks.

Questions? Problems? Don't panic, just call!
