

SUBAJAH

Presentation:

Inspired by African and Caribbean rhythms, which nurtured him from a young age, Subajah has developed a multi-influenced and unique sound built on original compositions filled with emotion.

His musical journey started very young, and Subajah quickly decided to dedicate his life to his two passions : **writing and music**. After years in the French underground Rap scene, he will then explore the world of sound systems in Paris and start learning the guitar and bass. Finding his path in Reggae music and in quest of new musical adventures, he leaves France in 2007 and move to London. **There he finds a very active reggae scene where he formed his band" The Architects band"**.

Subajah constantly innovate and create while keeping that essence that defines him. His touching voice, pertinent lyrics and spiritual energy define this artist who delivers conscious messages, full of hope, love and positive vibrations to his audience.

In 2014, Subajah releases his EP "Voice of Freedom". On this EP, we can find the exceptional track "Free Mindz", surely infused with the sound of the Virgin Islands Nu Roots Reggae.

"This EP gives a good sense of the breathy, ethereal, and pleading voice of a fine young, spiritual, multi-cultured singer" - (United Reggae)

Subajah features on various projects and compilations. In 2015, we find him on the Soul High Riddim with the track "Selassie for sure", and on the West Sun Riddim with "Open the gates", two tracks against injustice and iniquity in the world.

In 2016, Subajah releases "Hold you", a soul and jazz influenced reggae ballad, sign of his musical versatility.

Subajah released his longly anticipated album "Architect" in 2017 and demonstrated once again the power and diversity of his music including some deep slow roots songs, African influences acoustic songs, upbeat nu roots songs, and dancing steppa rhythms.

"In summary, this album is in no doubt, one of the best albums I have heard in 2017 so far, not just in the lyrical content and production but also in the usage of musical instruments ... In completion of listening to it, I feel motivated, energised and inspired. (Gav, Pauze radio)

He was back in 2020 with Back 2 Da future, a futuristic, energetic digital track in collaboration with First Eye in which Subajah's creativity is used to describe a society whose progress might actually bring human kind backwards in some aspects.

Back 2 Da Future is a sizzling piece of work from Subajah and First eye Productions. Musically creative and wholly constructed to fit the lyrical content perfectly, it's infectious and infinitely listenable. And, the message is pertinent and searing. A veritable anthem for 2020. Stellar. (Mr Topple)

The same year, Subajah has started working with D Rebell, producer based in Trinidad and bassist of the band Buzzrock, with him he realized and the title " Ancient Song" and have been working on future projects

In November 2020, Subajah, marks a new chapter on this musical voyage and released" Cornerstone", an ethereal acoustic Nyabinghi song, entirely composed, recoded, played and mixed by Subajah for Dashen Records

He has since been working on his first acoustic album in collaboration with the talented multi instrumentalist Moussa Dembele and his preparing to bring a new sound to this world!
