

## Fertile Reality

We have a stack (ca. 60×60×60cm) of soundgear with in-ear-monitor system. We plug into the system our drums (2 mics / and part is electronic), bass, keyboard, guitar and two vocal mics. From our soundsystem a Right and Left signal is delivered to the PA.

We need one power socket (type F) for the sound system, which feeds all gear and instruments. For additional led lights 3 extra sockets (left, right and centre stage) would be helpfull.
