11. Silverlake
12. Lovin' You (Tape Version)
13. Dead End

Firn returns with his second album in 2021, a loose collection of Electronic tracks, produced in the timespan of the last two years.

Vocalist CMA is featured on the first track, and original material from sample creator Wavparty was dubbed over and integrated into some of these tracks, where beats interact with ambient textures, shimmery harmony lines and rare melodic snippets.

All production was done at NR's homebase studio NRAudioDev, including recording and mastering.

Available digital and on analogue tape.

- Latest by critically acclaimed Electronic artist
- No export restrictions
